## ► Hydraulic Briquetting Press Machine

### Technical Specifications

| Model              | OVB-300-B                          |
|--------------------|------------------------------------|
| Capacity           | 300 Ton                            |
| Briquette Shape    | Cylindrical                        |
| Briquette Diameter | 120 MM                             |
| Briquette Height   | 100 MM                             |
| Briquette Weight   | 3-5 Kg                             |
| Cycle Time         | 10-15 Sec/Briquette                |
| Production Rate    | 1 to 1.2 T/h                       |
| Application        | Copper, Aluminium, MS, CRC, Nickel |
| Main Motor         | 30 HP                              |
| Operation          | Fully Automatic with PLC Control   |
